## ENVIRONMENTAL FACTS

*Provided by Slade 7<sup>th</sup> Graders*

- **Electronics can produce toxic e-waste if not disposed of properly. Mining rare Earth metals to support electronics can consume lots of energy and destroy the environment. Awareness of where electronics come from is important.**
- **Buying local products and produce is a good way to cut down on pollution from transportation emissions.**
- **The Earth's Rainforests are being cut down at a rate of 100 acres per minute.**
- **Raising animals for food takes up half of all water used in the United States.**
- **The most common trash found in the ocean are plastic bottles, food wrappers, bottle caps, and fishing gear. Disposing of them properly prevents them from entering the ocean.**

## HASA HAPPENINGS

### • Help Sweeten Teacher Appreciation Week!

On Tuesday, May 5th, our incredible faculty and staff will be treated to a catered lunch as part of our Teacher Appreciation Week celebration. While the meal is covered, we're looking for a little extra help to make it even more special. Donations of canned drinks and store-bought desserts are greatly appreciated!

If you're able to contribute, it's a simple (and delicious) way to say "thank you" to the amazing educators who give so much every day.
